RE: CALFED BAY-DELTA PROGRAM

To Whom It May Concern:

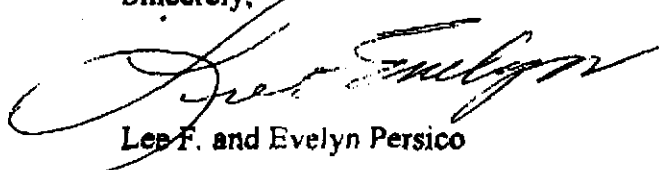

This letter is written on behalf of Lee F. and Evelyn Persico. We live and own 200 acres in Willits, California, and are concerned about the watershed program and what this means for our area. Our concerns are as follows.

We feel that there has been insufficient notification for public comments in this county and would like to see the time period for public awareness discussion extended for at least 90 more days. Notification should be published in our Willits paper as well as Ukiah and Eureka. Representatives from CALFED, concerning the Bay-Delta Program, should schedule several meetings, perhaps in Ukiah, Willits and Eureka, to personally discuss this plan.

Why does the Bay-Delta "ecological health and restoration" Program pose any concern to Mendocino County? Whatever the true agenda may be, CALFED and the Bay-Delta proponents should not misrepresent their program. Scare tactics affect Mendocino County as well as other counties. As concerned property owners, we want to be assured that the decisions made in the near future to benefit communities south of Mendocino County will not drastically as well as negatively affect this area and our ecological systems, not to mention our streams and various water shed facilities.

Therefore again, we would like to see "planned", isn't that after all the key word, extended public discussion periods held in Mendocino County. "Working Together for a Solution".

Sincerely,

Lee F. and Evelyn Persico

RE: CALFED BAY-DELTA PROGRAM

To Whom It May Concern:

This letter is written on behalf of Ray and Peggy Hebrard. We own 130 acres in Willits, California, and are concerned about the watershed program and what this means for our area. Our concerns are as follows.

We feel that there has been insufficient notification for public comments in this county and would like to see the time period for public awareness discussion extended for at least 90 more days. Notification should be published in our Willits paper as well as Ukiah and Eureka. Representatives from CALFED, concerning the Bay-Delta Program, should schedule several meetings, perhaps in Ukiah, Willits and Eureka, to personally discuss this plan.

Why does the Bay-Delta "ecological health and restoration" Program pose any concern to Mendocino County? Whatever the true agenda may be, CALFED and the Bay-Delta proponents should not misrepresent their program. Scare tactics affect Mendocino County as well as other counties. As concerned property owners, we want to be assured that the decisions made in the near future to benefit communities south of Mendocino County will not drastically as well as negatively affect this area and our ecological systems, not to mention our streams and various water shed facilities.

Therefore again, we would like to see "planned", isn't that after all the key word, extended public discussion periods held in Mendocino County. "Working Together for a Solution".

Sincerely,

Ray and Peggy Hebrard
